

Accessibility Testing Services

Testing solutions & expertise for
WCAG 2.0 and section 508 guidelines

Accessibility Testing Services

In today's digitally transformed world, companies have their products and offerings online for the convenience of the consumers. However, if the readily available information is not accessible and usable by even a small percentage of consumers, it results in an opportunity lost to grow and retain the customer base. To provide an enhanced customer experience by integrating disparate technologies and user-friendly interfaces, it is important that the web content complies with statutory regulations and W3C guidelines.

MNJ Software continuously strives towards following the industry changes and develop services & solutions to make the customer systems compliant. MNJ Testing Center of Excellence (CoE) brings in its expertise through Applications Accessibility Assessment (AAA) platform to ensure applications are compliant with industry-wide accessibility best practices & guidelines like of WCAG 2.0 and Section 508 guidelines.

Why MNJ Software?

- Committed to simplify complex customer interactions while delivering a seamless experience, MNJ Software provides integrated BPM, Technology and Digital Services & Solutions for clients across industries for over 5+ years.
- Maintaining the highest standards of quality with products and services which comply with international standards and the legal requirements.
- Reduction in total cost of ownership and time to market by 15% with reusable test repository.
- Reduction in testing cycle time by 15-24% with customized testing accelerators.
- Reduction in rework due to continuous integration by 60%
