# DevOps

Speed, Reliability and Resilience for IT Delivery

Introduction
DevOps at MNJ Software

In today's fast-paced business environment, technology leaders are realizing that traditional ways of developing and delivering software does not meet the unprecedented speed and flexibility required by digital businesses.
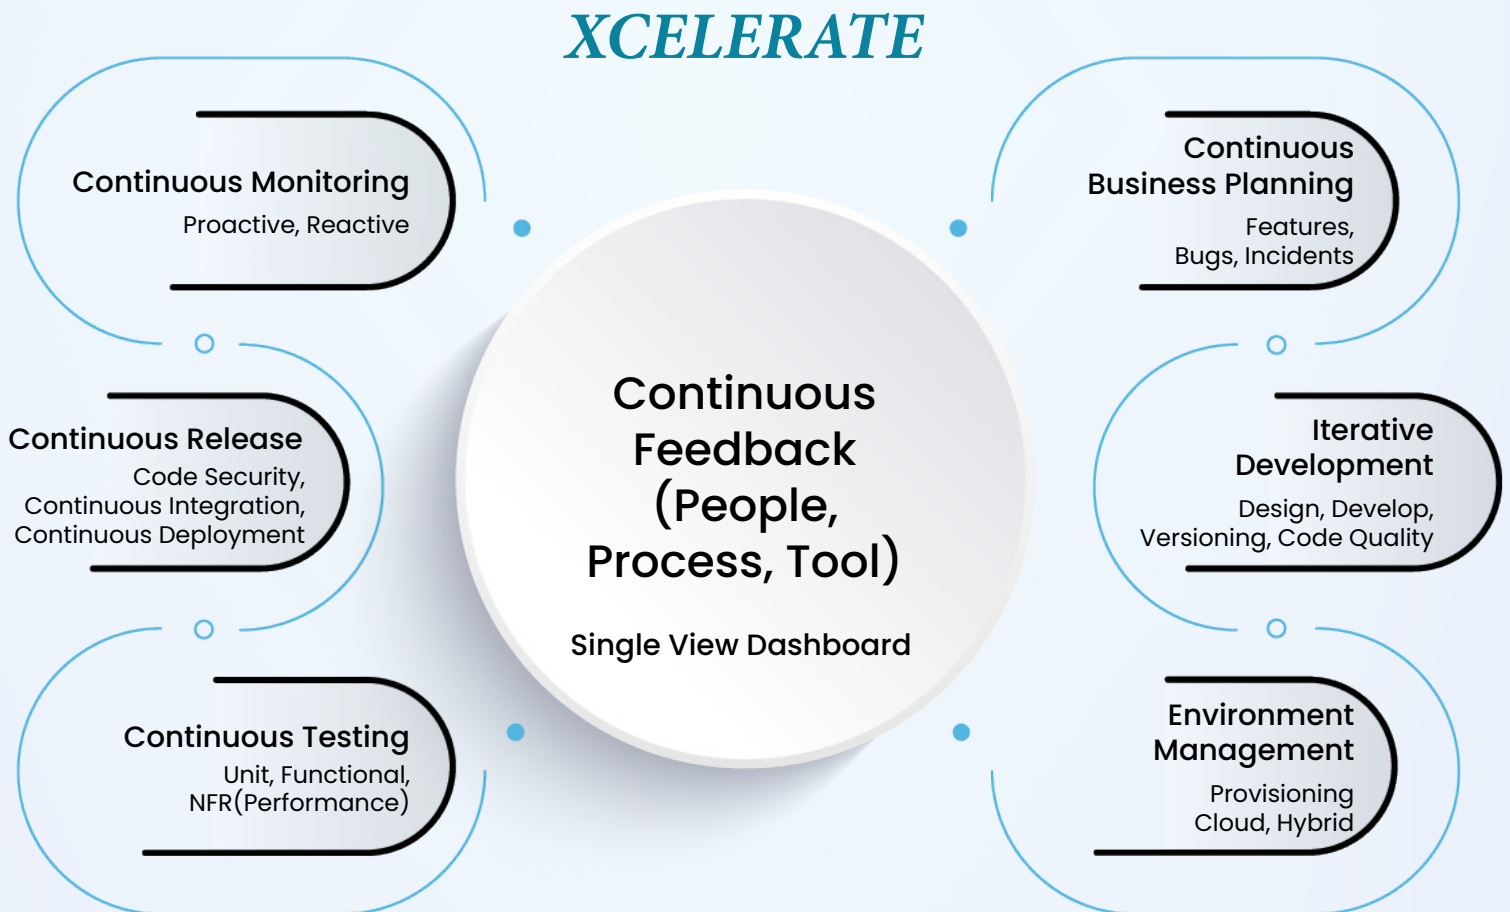

DevOps is the leading software engineering methodology that makes this change possible by bringing development, testing, and operations stakeholders together to streamline IT delivery. Leveraging a powerful combination of Devops and Agile practices, MNJ Software DevOps services integrates People, Process and Tools enabling collaboration and communication via automation thereby accelerating an organization's ability to deliver application and infrastructure changes at high velocity.

Xcelerate DevOps Model

MNJ Software sees DevOps as a discipline that bridges the gap between development and operations. Our approach is based on agile and lean principles that unify business owners, development, operations, and quality assurance team for better, faster and stable outcomes.

MNJ Software Xcelerate DevOps Model represents both technology and culture change. It is based on the approach of automation, constant evolvement, and regular improvement through continuous feedback.

Real –time insights are made accessible to the stakeholders involved on an integrated platform.

XCELERATE

Continuous Monitoring
Proactive, Reactive

Continuous Business Planning
Features, Bugs, Incidents

Continuous Release
Code Security, Continuous Integration, Continuous Deployment

Continuous Feedback (People, Process, Tool)
Single View Dashboard

Iterative Development
Design, Develop, Versioning, Code Quality

Continuous Testing
Unit, Functional, NFR(Performance)

Environment Management
Provisioning Cloud, Hybrid

Integrate Operations to Development across Application Lifecycle | Aligns across People, Process and Tools | Development, Test, Infra and Operation Teams

Comprehensive DevOps Services from MNJ Software

Enabling Digital Businesses through Enterprise DevOps

MNJ Software DevOps Center of Excellence (COE) holds strong domain knowledge and DevOps capabilities that act as an enabler for businesses to react to dynamic operative environment quickly & efficiently.

DevOps COE has a 360-degree view of the software development process. It helps organizations to align their business, applications, and operations teams through our advanced services in DevOps and Agile consulting and delivery. Be it standalone DevOps-Agile assessment or full scale implementation to enable a transformation journey or managing and monitoring the IT environment, MNJ Software can take care of every need.

People

Process

Tools

With full stack people, we establish cohesive process, and integrate right tools to deliver desired business impact.

Our Services Include

Transform
